

Coin/Token Operated Timers for Many Applications with a three different timer options.

Coin operated timers for SHOWERS or for use on recreational lighting, pumps, TV's, radios, compressors, Jacuzzis, hot tubs, or many other electrical devices. All meters feature heavy gauge welded steel housings.

The HM5 uses Vertical Eight or the Laydown Model 444, and a standard coin box. The service door is in the rear.

The HM6 uses a roll-down coin mechanism with large guardian coin box.

This one also features a design allowing all service from the front.

The HM6 is now available in stainless steel for use in harsh environments

PUSH BUTTON TIMER

YOU MAY NOT WANT CHARGE YOUR PATRONS TO USE A FACILITY BUT STILL NEED TO CONTROL USAGE

A non-coin option that will allow you to control how long the timer runs without charging your customer for the use of the facility. This NEMA 4X, button, offers a choice of three timers in a range of voltages and time, and the optional alarms are weather proof. Ideal for showers or other wet environments. Timer, button and alarm are all contained in one compact unit. Timer options include a wide range of time intervals and voltages to suit your needs. An added option is the key operated lock-out to control when it is available.
